

Guide

to pool care

bioguard® pool care dive into it.

Your approach to pool care matters. At BioGuard®, we know that getting your pool on a program is the smartest and most convenient way to have crystal blue sparkling water. What could be simpler than following a step-by-step program that accounts for everything you need to maintain a beautiful pool? That's why we offer three different programs that not only deliver simple, expert pool care—but also help you prevent problems before they get started.

Of course, it takes expert products and accessories to make everything work just right. And we've got it.

An overall look at what BioGuard® can offer for your new pool.

easy pool care programs:

Your approach to pool care does matter. That's why we came up with the program approach. Easy, uncomplicated pool care is what it all boils down to. Follow the steps. Keep up maintenance. And the results are clear, beautiful, inviting water. You know what to sell. Customers know what to buy.

Once-a-week 3-step program

Gorgeous pool water in just minutes a week. A convenient and flexible system, the once-a-week 3-step program is a popular choice for simple pool care that takes only minutes to maintain. Crystal clear, brilliant pool water is yours in just three steps—sanitizing, oxidizing, clarifying and preventing algae.

It's as easy as 1-2-3!

- STEP 1 Use Smart Sticks[®], to sanitize water and kill bacteria
- STEP 2 Smart Shock[™] will oxidize and clarify — producing sparkling clear water
- STEP 3 BackUp[®] works to prevent algae growth before it starts

SoftSwim[®]

Soft, clear, CHLORINE-FREE water is easy to achieve. This non-chlorine sanitizing system is simple to use and—thanks to biguanide, our non-halogen alternative—it's gentle on skin, hair and eyes. What's more, adding Assist[®] to the program makes it work even better—eliminating existing or recurring mold and slime in the pool circulation system.

It's the A-B-Cs of non-chlorine pool care!

- SoftSwim A stops algae growth before it starts
- SoftSwim B works to thoroughly sanitize water
- SoftSwim C removes contaminants, which keeps water sparkling clear

*Assist is not available in California.

Mineral Springs[®]

Our revolutionary, amazingly simple pool care program is mineral-based for an experience that's unlike any other swimming experience you have ever had. Mineral Springs creates a soft, luxurious, and brilliantly clear swimming environment. Mineral Springs is the low-maintenance pool care offered by BioGuard. Mineral Springs is especially well-suited for frequent travelers or vacationers. This system works for you!

Transform your pool into a vacation getaway!

- A gentle way to sanitize and maintain sparkling pool water
- Create a mineral water bathing environment
- Easily installed on new above-ground and in-ground pools or retrofitted on existing pools

products & accessories

With the right program for your pool figured out, you'll have the basics of pool care covered. All that's left is the maintenance needed to keep your water sparkling clear and inviting all summer long. BioGuard[®] also offers a comprehensive range of products and accessories to help you handle every pool care situation imaginable.

Having a problem with algae? Check out fast-acting Banish[®]. Looking to soften the feel of your water?

Look into Optimizer[®] Plus. Got trees in your backyard that shed a lot? Invest in a quality net or skimmer. No matter what the situation, your local BioGuard Dealer can help you find the right solution from our family of products and accessories.

Here's a snapshot of what BioGuard has to offer, but we also encourage you to visit bioguard.com for more on what they do and how to use them. Or just talk to your local BioGuard Dealer—your authorized pool care expert.
