your pool.

Introducing BioGuard's SilkGuard™ Technology

A Revolution in Pool Care

Does your chlorine do more than just sanitize? Does it protect more than just your pool's water? When was the last time you heard someone tell you their chlorine actually made their water FEEL better? SilkGuard technology is the innovation behind BioGuard's newest sanitizers, Silk Tabs™ and Silk Sticks™, the products redefining chlorine.

A Difference You Can Feel

The difference in our SilkGuard products is visible in the product itself – they're blue! However, the real revolution begins when you add Silk Tabs and Silk Sticks to your pool. Not only does it sanitize by killing bacteria, SilkGuard actually softens the water, so that it feels smooth! Imagine enjoying the benefits of crystal-clear, blue, sparkling water AND a soft, smooth swim at the same time.

Additional Protection For Your Pool

There are even more benefits that you won't get from regular chlorine. SilkGuard attaches itself to hard water components and metal surfaces, protecting against corrosion, scale, and staining. This translates to longer life for your equipment and better protection for your pool.

Sunshield® Technology Protects Chlorine

Sunshield, yet another additive found in Silk products, protects chlorine from the degrading effects of UV rays. The result? Crystal-clear, sparkling water for a much longer period of time.

SilkGuard is Only from BioGuard

No other product can multi-task quite like Silk Tabs and Silk Sticks from BioGuard, and no other brand can offer such a time-saving, hard-working sanitizer. Look for the BioGuard-exclusive SilkGuard products. Available in sticks, 1-inch and 3-inch tabs.

SilkGuard Makes The Difference
